Student Feedback/view/outcome of event	Students learnt the importance of PCB Designing, why it is used. The in-depth learning of PCB devices. They also learnt the uses of PCB devices in their everyday life.
Summary of The Event (eg:what did Speaker emphasized on)	PanTech E Learning conducted workshop on Printed circuit board (PCB) design brings your electronic circuits to life in the physical form. Using layout software, the PCB design process combines component placement and routing to define electrical connectivity on a manufactured circuit board. Most medical devices use a high density PCB which is used to create the smallest and densest design possible. Without PCB communication is not possible.PCB is the heart of electronic devices and both their quality and reliability is directly correlated with quality and reliability of electronic equipment. PCB types, what is standard PCB, PCB is used inside TV and other mechanically supported electronic components.
